

HAVE YOU SECURED YOUR BUSINESS?

We Know How to Defend Your Data

Small to medium-sized businesses (SMBs) are victims of the majority (64%) of today's attacks, and it's because they are inadequately protected. Don't be one of them.

TOP SECURITY CONCERNS FOR SMBs

- Constantly evolving cyberthreats
- Data breaches, ransomware and malware
- Shifting regulations and compliance issues
- Remote workers and remote access
- Mobile device management
- Email and cloud security

IT'S TIME FOR A PROFESSIONAL CYBERSECURITY SOLUTION

Partner with a managed services provider (MSP) for top-tier IT services and work with cybersecurity experts who will help your business stay one step ahead of hackers.

Benefits Include:

1

VULNERABILITY AND SECURITY ASSESSMENTS

- We'll identify ways to immediately secure your business
- You'll protect your data, cloud, clients and remote workforce

2

SEAMLESS ENDPOINT PROTECTION

- We'll stop active threats, investigate origins and minimize harm
- You'll take advantage of Endpoint Detection and Response (EDR)

3

SaaS AND SECURITY FOR CLOUD-BASED APPS

- We'll actively monitor Microsoft 365 and other apps for risks and threats
- You'll receive a daily review of account activities and anomalies

4

ALL-ENCOMPASSING NETWORK SECURITY

- We'll provide you with comprehensive SIEM services
- You'll enjoy nonstop monitoring from a 24/7 Security Operations Center

5

COMPREHENSIVE PROTECTION FOR SMBs

- We'll close gaps in security while adhering to best practices
- You'll leverage technology to grow your business and achieve compliance

DON'T BE BLIND TO YOUR RISK

Your data is more valuable than you think it is, and today's hackers will stop at nothing to get to it.

39 SECONDS

Hackers work around-the-clock, pulling off a successful cyberattack every 39 seconds.
-The University of Maryland

6 REASONS TO INVEST IN A ROBUST CYBERSECURITY SOLUTION

- Avoid business email compromise (BEC) attacks
- Protect your reputation
- Safeguard precious data
- Defend digital assets
- Secure your remote workforce
- Keep information off the dark web

5 WAYS TO IMPROVE CYBERSECURITY

1. Talk to Experts—work with trusted pros
2. Identify Weaknesses—get an assessment
3. Develop a Strategy—go beyond the basics
4. Invest in Security—minimize digital risk
5. Protect Your Brand—defend your data

Is Your Valuable Data on the Dark Web?

Would your biggest competitor pay top dollar to see to your secret business plans, financial records or customer lists? Would someone pay for your passwords to gain access to your network? The answer is yes, and it happens all the time on the dark web

Small to Medium-Sized Businesses Are Exposed

SMBs that want to keep their data off the dark web and out of hackers' hands are investing in comprehensive cybersecurity solutions that include routine scans, 24/7/365 monitoring and advanced data backup and recovery services
